

Getting Started With Bluehost Guide

Are you ready to create your foundations and get your WordPress site up and running in just a few minutes? Follow the steps below to get started!

Set Up Your Hosting Account

Just like the name implies, your hosting account is where your website will 'live'.

There's a ton of hosting platforms out there. Most are a pain to work with. My #1 recommendation is [BlueHost](#) for the reasons below, and I will visually walk you through the steps of setting up your hosting account in minutes! If you use my BlueHost link, I will receive a commission.

1. [Bluehost](#) is a proven company. Many people have created 6-7 figure blogs with Bluehost.
2. Out of all of the hosting services we've tried, Bluehost is the best and their service is phenomenal and they are located in the US. You don't have to worry about working with people who don't understand English.

3. Because I am a preferred partner of [Bluehost](#), **you** qualify for the **lowest and best rates available**.
4. Bluehost's 'up time' and 'page load time' ranks the highest in the industry.

[CLICK HERE](#) to get your free domain (*you can also transfer your current one*) and signup for hosting with Bluehost, and then follow the steps below!

Step #1

[Click here](#) (same link as above) and click the green 'Get Started Now' button.

Money-back Guarantee

Try us and love us, or get a refund within 30 days of signing up. Your satisfaction is our top priority.

[Learn More](#)

Free SSL Included

Every website hosted at Bluehost is given a free SSL certificate. Protect your website visitors with one click.

Step #2

Pick the best plan. Plus is the best in my opinion because you get unlimited everything, including websites added to one hosting account. You're going to need more domains than just one if you're running multiple sites, offers, products, and services.

	starter	plus most popular	business pro
	normally \$5.99 \$3.49 per month	normally \$9.99 \$5.49 per month	normally \$19.99 \$13.49 per month
	select	select	select
websites	1	unlimited	unlimited
website space	unlimited	unlimited	unlimited
bandwidth	unlimited	unlimited	unlimited
included domains	1	1	1
parked domains	5	unlimited	unlimited
sub domains	25	unlimited	unlimited
email accounts	100	unlimited	unlimited
email storage	500 MB per account	unlimited	unlimited
marketing offers	\$50 included	\$200 included	\$200 included
	select	over \$24/yr in extras Global CDN 1 SpamExperts	over \$180/yr in extras Global CDN 2 SpamExperts

Step #3

Pick your free domain name or bring over your current domain. Both are very simple to follow.

new domain
Help me get my free domain!

Type your domain name above

[next](#)

i have a domain name
I want to signup with my existing domain

Type your domain name above

Note (optional): Bluehost can provide domain registration transfer steps.

[next](#)

Step #4

Place your order and pay for your plan.

sign up - congratulations!

Enter information for your new account. Domain: `asdasdasdasdasd.com`

account information

All fields are required unless otherwise noted.

First Name	<input type="text"/>
Last Name	<input type="text"/>
(optional) Business Name	<input type="text"/>
Country	<input type="text" value="United States"/>
Street Address	<input type="text"/>
City	<input type="text"/>
State	<input type="text" value="Please select a state"/>

Step #5

Bluehost will email you your login information. Login to Bluehost, and you'll be taken to Bluehost's dashboard where you can install WordPress by double-clicking on '*Install WordPress*'

Step #6

Click the the green install button.

Step #7

Choose the domain you just registered or the one you transferred over.

Step #8

Check the 'Show advanced options' box and fill in the title, username, and password. Your title should be the name of your blog. The username and password will be what you use to login to the backend of your blog (your WordPress dashboard).

IMPORTANT: Save this information somewhere where you won't lose it. You will need it for step #10

Last step, you are almost there!

Show advanced options

Site Name or Title
Test Site

Admin Username
email@gmail.com

Admin Password
123pass321

Automatically create a new database for this installation.

Install Now

OR

Change Install Location

Step #9

Bluehost will install WordPress on your server (the hosting we bought) and let you know when it's complete.

Click the 'View Credentials' button on the top right.

Step #10

Click on 'Admin URL' (located below the green box) and enter your WordPress login credentials from step #8. This will take you to your WordPress dashboard. Your WordPress dashboard is where you will do just about everything on your blog. From writing articles to changing design.

Notification Center > INSTALLATION CREDENTIALS

Congratulations on the installation of your new WordPress site! **Your login information is below.**

Step 1. Access your New WordPress site

URL: 

Admin URL: 

The image shows the WordPress login page. At the top center is the WordPress logo, which consists of a circular 'W' icon followed by the word 'WORDPRESS' in a blue, serif font. Below the logo is a white rectangular login form with a light gray border. Inside the form, there are two text input fields: the first is labeled 'Username' and the second is labeled 'Password'. Below the password field is a checkbox labeled 'Remember Me'. To the right of the checkbox is a blue button with the text 'Log In' in white. Below the login form, there are two links: a blue link that says 'Lost your password?' and a blue link that says '— Back to WordPress Test Site'.

Great Work!!

Now [click here](#) and get started with your site!
